

KANTARELL PENDANT

BRAND PARTNER: NEW WORKS

The idea for the Kantarell series originated from a study of directing light. With its trumpet-like shape acting as a funnel, Kantarell spreads the light from a nearly hidden light source at its centre. The strong silhouette of the lamp invites different mounting options - high or low - unfolding various aspects of the poetically flowing shape, from the vaulted underside to the soft dale of the top. With every viewpoint, the Kantarell Pendant Lamp makes a sculptural addition to a space.
