

LIMIT LOUNGE CHAIR

normann
COPENHAGEN

A REISSUE OF NIELS BENDTSEN'S ICONIC 1974 DESIGN

Originally developed in Copenhagen in 1974, Limit Lounge Chair quickly gained international recognition. With this reissue, Normann Copenhagen affirms the enduring strength of the original design's material logic and restraint — acknowledging that some designs are simply right the first time. The name Limit reflects the conditions under which the chair was conceived — a moment defined by material scarcity and structural clarity — and speaks to a design shaped by conscious reduction rather than excess. Its ingenuity earned it a place in the permanent collection of the Museum of Modern Art (MoMA) in New York. Decades later, its relevance feels undiminished.

Limit Lounge Chair
H: 68 x W: 67 x D: 68 x SH: 37 cm

Limit Lounge Chair Cover
H: 69 x W: 71 x D: 77 cm

PRODUCT FACTS

Description

Limit Lounge Chair is a reissue of Niels Bendtsen's iconic, material-efficient 1974 design. Featuring a lightweight steel frame and suspended padded upholstery, it exemplifies how design can achieve maximum impact with limited materials. Built for comfort and flexibility, the chair can be linked into modular configurations using optional connectors (sold separately) and is available for both indoor and outdoor use. The outdoor version includes a protective cover for added protection when not in use.

Designer / Year Of Design

Niels Bendtsen / 1974

Material

Indoor version

Frame: Black powder-coated steel

Cover: Inner layer of a net-like weave in PVC-coated PET and outer layer of wadding, upholstery and a zipper.

Outdoor version

Frame: Electroplated steel with Black powder-coat.

Cover: Inner layer of a net-like weave in PVC-coated PET (UV stable for outdoor use) and outer layer of wadding, upholstery and a zipper.

Construction

The Limit Lounge Chair features a steel frame paired with a padded cover. The frame is available in either a powder-coated finish for indoor use or an electroplated and powder-coated finish for enhanced durability outdoors.

The cover includes an inner layer made from a net-like weave of PVC-coated PET, providing UV stability and making it suitable for outdoor environments. The outer layer consists of wadding and upholstery, which is fitted securely onto the steel frame using a zipper.

Optional connectors can be purchased, allowing multiple chairs to be linked together seamlessly, enabling flexible configurations of any length.

Maintenance

Clean gently with mild soap and a damp cloth. Avoid prolonged contact with water, and use the complimentary rain cover when not in use. In harsh weather such as snow, storms or large amounts of rain, we recommend storing the Limit Lounge Chair Outdoor inside.
